

THE STRATEGIC GOAL

To create a culture of learning and innovation that grows, supports and sustains an environment for patient-oriented research, knowledge synthesis, guideline development, and knowledge translation.

THE GUIDING PRINCIPLES

Developing and mobilizing expertise

Supporting careers

Facilitating collaboration

Building a culture of knowledge-to-action research

ACROSS THREE TYPES OF LEARNERS

1

Graduate-level trainees and fellows

2

Researchers and research staff

3

Patient partners and health system decision-makers

WITH A RANGE OF LEARNING OPPORTUNITIES

Courses and Workshops

Webinars and Web-based Learning Modules

Mentorships

Seed Grants

Publications and Meetings

TO BUILD THE FOLLOWING CAPACITIES

Effective communication and collaboration with others

Able to produce and use research to inform health system decision-making

Researchers and decision makers understand the value of engaging patient partners in health research

Researchers demonstrating proficiency in the science and practice of knowledge synthesis, guideline development, and knowledge translation in a patient-oriented research environment
